Description

Descrizione

GORE-TEX INFINIUM

It's a GORE-TEX membrane that offers breathability and protection from light rain and snow. The garment is wind-proof, water resistant and very light, for the best comfort in any weather condition.

GORE-TEX INFINIUM

È una membrana GORE-TEX che offre una protezione ultra-traspirante da pioggia leggera e neve. Essa rende il capo antivento, water resistant e leggerissimo, per il massimo del comfort in qualsiasi condizione meteo.

GLOSSARY

TECHNICAL ICONS

Icon

Description

BREATHABLE

Breathable garments are air permeable. This benefit is most useful during physical activity, when there is an increase in body heat inside the garment. The breathability of the fabric allows moisture vapor transfer (MVT) or the capacity for warm, humid air inside the garment to pass through the garment to the outside. This helps to manage the climate inside the garment, increasing comfort.

Descrizione

TRASPIRANTE

I materiali traspiranti sono permeabili all'aria. Questa caratteristica è solitamente di beneficio durante una attività fisica più intensa, quando la temperatura corporea aumenta all'interno del capo. È in questo momento che entra in azione la traspirabilità del materiale che permette la fuoriuscita di vapore acqueo verso l'esterno del capo. Ciò aiuta a mantenere costante la temperatura interna, aumentando il comfort di chi indossa il capo.

COMFORTABLE

Garment is constructed with stretch knit or stretch woven fabric to enhance fit and mobility. Elasticated yarn provides permanent stretch and recovery properties.

CONFORTEVOLE

Capi costruiti in maglia stretch o in tessuto stretch per aumentarne la mobilità ed il comfort. Le fibre elastiche conferiscono uno stretch permanente del tessuto.

INSULATION

Insulated garments provide comfort and warmth in cold conditions by trapping air, that has been warmed by body heat, inside of the garment. This can be achieved via the very small spaces between lofty down filaments, or between fine strands of synthetic fibers. Whether down or synthetic or even wool, insulation comes in a variety of types, weights and warmths. Some insulation performs well in wet conditions while others do not.

ISOLAMENTO

I capi con questa caratteristica risultano caldi e confortevoli a basse temperature. Il processo è quello di trattenere l'aria che a contatto con il corpo umano si è riscaldata. Il tutto è reso possibile da piccolissimi spazi inter stanziali tra i filamenti della piuma o delle fibre sintetiche utilizzate. Sia che si tratti di vera piuma, imbottitura sintetica o di lana, l'isolamento (insulation) può essere di varie tipologie, pesi e calore. Alcune tipologie di isolamento termico funzionano meglio in condizioni di umidità variabile, altre meno.

WATERPROOF

These garments are intended to protect the wearer from the harshest conditions. A waterproof garment is not simply made by using a waterproof fabric. To achieve waterproofness, the seams, zippers, pockets and closures must be constructed in order to prevent water from entering the garment and to protect the wearer from the elements. Generally, this is achieved through seam-taping which seals the stitched seams from water penetration. Secure cuff-closures, storm-flaps over zippers, protected pockets and adjustable hoods provide additional waterproofing protection.

IMPERMEABILE

Sono waterproof quei capi d'abbigliamento che servono a proteggere dalle condizioni atmosferiche più difficili. Quando si definisce un capo di abbigliamento waterproof (impermeabile all'acqua) non si intende solamente che sia impermeabile il tessuto che lo compone. Per definire l'impermeabilità anche le cuciture, le cerniere, le tasche e le chiusure devono essere pensate e costruite in modo tale da risultare resistenti all'acqua, in modo che colui/colei che indossa quel capo sia protetto completamente. Solitamente queste caratteristiche sono date dal nastrare termicamente le cuciture, coprire le cerniere, i polsini, rendere il cappuccio aggiustabile/modulabile.

WINDPROOF

Garment is constructed with a material that is impervious to wind and helps to prevent heat loss by maintaining the body's warmth inside the garment.

ANTIVENTO

Capo d'abbigliamento che, grazie alle caratteristiche del materiale, protegge dal vento e limita la perdita di calore mantenendo costante la temperatura.

EXCLUSIVE. SUSTAINABLE. PERFORMANCE.

Equipped with advanced green technology and inspired by the ocean, our North Sails x Maserati collection is a statement of sustainable performance at its core.

INNOVATIVE BY NATURE.
CRAFTED TO BE UNIQUE.
